

THE VENUES WILL BE (ON THE BASIS OF THE MACRO-AREA):

June 2022 - Ospedale San Bassiano, Bassano del Grappa (Antonio Celia)

July 2022 - Clinica Humanitas, Milano (Antonio Saita)

September 2022 - Ospedale Careggi di Firenze (Alfonso Crisci)

February 2023 - Ospedale Cristo Re, Roma (Mauro De Dominicis)

June 2023 - Università di Foggia (Luigi Cormio)

December 2023 - Università degli Studi di Sassari (Massimo Madonia)

Management of urolithiasis is progressively becoming a complex sub-specialty in the urology field. The goal for the modern endourologist is looking a stone free operation, absence of complications and maximum comfort for the patient. This requires the perfect knowledge of all instruments available associated with the ability of adapting personal technique with patient and stone's characteristics. Furthermore, it is mandatory to have an adequate knowledge of all conditions causing stone formation, how to diagnose and prevent them.

The project Donatello wants to offer to trainees a comprehensive/intense course in the field of stone treatment which, we believe, is becoming fundamental for all urologists with interest in this sub-specialty.

This course is addressed to trainees at third year of Specialty training, it is three days long alternating lectures, hands-on on dry lab, live and semi-live sessions.

At the end of the course, a proficiency questionnaire will be performed. The trainee with the best result will be offered a subsequent training opportunity.

DAY 1

14.00 Introduction (A. Celia)

“THE ART OF MODELLING THE STONES” lecture by

14.30 Moderators: A. Porreca, M. Mangano, P. Ferrarese

Nephrolithiasis is a systemic condition (G. Gambaro)

Metabolic screening

Urinary Stones: dietary adjustments and medical treatments (C. Benedetti)

Peri-operative prophylaxis and management of infections (G. Rorato)

Urinary stones: main imaging modalities (C. Cicero)

16.00 *Coffe Break*

16.30 Moderators: M. Amenta, L. De Zorzi

Renal colic: medical treatment and management of complications (F. Visalli)

ESWL: all you need to know (S. Bucci)

RIRS: indications and instruments (L. Ruggera)

RIRS: how to perform a safe procedure & management of complications (D. Brotza)

17.30 Round table: multidisciplinary management of patients with urolithiasis (Lentini, Benedetti, Rorato, Mazzon)

18.00 *Dry lab: EST*

19.00 Closure of the day

THE VENUES WILL BE ON THE BASIS OF THE MACRO-AREA

June 2022 - Ospedale San Bassiano, Bassano del Grappa (Antonio Celia)

July 2022 - Clinica Humanitas, Milano (Antonio Saita)

September 2022- Ospedale Careggi di Firenze (Alfonso Crisci)

February 2023 - Ospedale Cristo Re, Roma (Mauro De Dominicis)

June 2023- Università di Foggia (Luigi Cormio)

December 2023 - Università degli Studi di Sassari (Massimo Madonia)

DAY 2

08.30 Moderators: P. Beltrami, L. De Zorzi, F. Dal Moro

Live surgery: 3 RIRS (G. Mazzon, A. Caruso, D. Brotza)

13:30 *Lunch*

14.30 Moderators: C. Morana, V. Di Marco

Percutaneous/complex treatment approaches:

Standard prone PCNL (V. Lacola)

Mini PCNLs (S. Choong)

e-CIRS (D. Maruzzi)

Open surgery (L. De Zorzi)

Lap/robotic (F. Dal Moro)

Complex stones & nightmare cases (P. Beltrami, G. Mazzon, L. De Zorzi)

discussion of difficult scenarios including also cases presented by participants

17.00 *Dry lab: EST*

18.00 Closure of the day

DAY 3

08.30 Moderators: P. Ferrarese, L. Ruggera, C. Morana

Live surgery: PCNL/e-CIRS (A. Celia, G. Mazzon, A. Caruso)
